

# STUDENTSKE AKTIVNOSTI

STUDENTS' ACTIVITIES

STUDENTISCHE AKTIVITÄTEN

## NAŠ STUDENTSKI ZBOR

Studentski zbor Sveučilišta u Mostaru u akademskoj 2008./09. godini djeluje devetu godinu po sadašnjem ustroju i od samog početka studentski predstavnici Građevinskog fakulteta dio su Studentskog zbora Sveučilišta. Svake se godine održavaju studentski izbori na svim fakultetima, gdje studenti biraju svoje predstavnike sa svake godine koji ih predstavljaju, kako u fakultetskoj podružnici, tako i u predsjedništvu Studentskog zbora Sveučilišta. Tako još od samog početka studenti Građevinskog fakulteta aktivno sudjeluju u radu Zbora. Tijekom svake akademske godine to podrazumijeva niz aktivnosti u cilju poboljšanja kvalitete školovanja i života studenata, ali nerijetko su studenti uključeni i u različite akcije kojima pridonose široj zajednici.

Dva puta godišnje studenti tradicionalno već niz godina organiziraju dobrovoljnu akciju darivanja krvi na Građevinskom fakultetu u suradnji s Odjelom za transfuziologiju Kliničko-bolničkog centra Mostar gdje je uvijek zapažen odziv studenata. Redovito se u predblagdansko vrijeme prije Božića i Uskrsa organiziraju humanitarne akcije gdje se prikupljaju novčana sredstva. Novac se svake godine uputi u neku od ustanova u gradu kojoj je u tom trenutku najpotrebniji, a studenti su uvijek ti koji predaju novac ili prigodne pakete i za vrijeme ovih blagdana uz druženje razvesele djecu s posebnim potrebama, stare ili nemoćne.

Vrlo su često naši studenti kao članovi predsjedništva Studentskog zbora Sveučilišta sudjelovali u bitnim raspravama, primjerice na temu aktualnog Zakona o visokom obrazovanju, ali i na temu trenutnog statusa Sveučilišta u Mostaru. Također su u par slučajeva stali uz svoje kolege s ostalih fakulteta u javnim prosvjedima, u organizaciji Studentskog zbora Sveučilišta, koji su na nekim fakultetima održavani u cilju poboljšanja studentskog standarda, smanjenja školarina i rješavanja ostalih studentskih pitanja. Studentski zbor redovito organizira i sportska natjecanja za sve studente Sveučilišta. Tako tijekom godine studenti imaju priliku sudjelovati na nogometnim, košarkaškim, odbojkaškim i stolnoteniskim turnirima.

Naravno, kakav bi to studentski život bio bez zabave, pa su u organizaciji Studentskog zbora upravo neke od najvećih zabava u gradu, Bručošijada i Apsolventsko večer, na kojima se svake godine izmjenjuju najpopularniji glazbeni izvođači. Uz to već par godina mladi umjetnici, glazbenici i pjesnici koji studiraju na našem Sveučilištu imaju priliku pokazati svoj rad na Večerima mladih umjetnika.

Studenti našeg Fakulteta zajedno sa svojim predstavnicima, uz sudjelovanje u svim aktivnostima u organizaciji Studentskog zbora Sveučilišta u Mostaru, organiziraju i niz događanja u svojoj podružnici. Tako vrijedi spomenuti kako se često u fakultetskoj Multimedijalnoj dvorani prikazuju filmovi, pa su

naši studenti u mogućnosti uživati u popularnim filmskim naslovima u ambijentu koji bar na trenutak može ponuditi doživljaj kino dvorane, pošto kina nemamo u gradu Mostaru. Vrlo često predstavnici studenata Građevinskog fakulteta organiziraju popularne večeri studenata Građevine, gdje se studenti, a nerijetko i asistenti mogu družiti u opuštenijoj atmosferi.

Jedan od najvećih i najvrjednijih projekata je zasigurno časopis studenata našeg Fakulteta koji se zove (NE)STABILNOST. Ukupno je do sada objavljeno šest brojeva časopisa. Uređuju ga i za njega pišu uglavnom studenti Građevine i u svakom se broju može naći ponešto za svačiji ukus, od trenutačno aktualnih tema iz struke, potom tema vezanih za Sveučilište, Fakultet, Mostar i život studenata, i na kraju nešto za zabavu.

(NE)STABILNOST je u stvari nastavak jednog uspješnog časopisa studenata Građevinskog fakulteta u Mostaru koji je izlazio osamdesetih godina i koji se zvao Uticajna linija. Taj je časopis godinama predstavljao građevince, a nakon sušnih devedesetih studenti su ponovno došli do svoga glasila.

Naši studenti redovito sudjeluju zajedno sa studentima iz Hrvatske na popularnoj Građevinijadi, skupu studenata građevinskih fakulteta sa Sveučilišta iz Hrvatske. Na ovim skupovima uz dobru organizaciju naših predstavnika omogući se odlazak preko 40 studenata Građevinskog fakulteta iz Mostara. Građevinijada podrazu-

## OUR STUDENTS' BOARD

In the academic year of 2008/09, the Students' Board of the University of Mostar has been functioning for the ninth year according to its present organization and representatives of students of the Faculty of Civil Engineering are part of the University Students' Board from the very beginning. Students' elections take place every year in all faculties, where students elect their representatives from each school year to represent them in the faculty branch as well as in the Presidency of the University Students' Board. In that way, students of the Faculty of Civil Engineering take active part in the operation of the board from the very beginning. During every academic year, that includes a number of activities aimed at improving the quality of education and students' life, but students are also often involved in various activities contributing to the wider community. For many years now, students organize a voluntary blood donation campaign

## UNSERE STUDENTISCHE VERTRETUNG

Die studentische Vertretung der Universität in Mostar im Studienjahr 2008/09 besteht schon das 9. Jahr, im jetzigen Aufbau und von Anfang an sind Studentenvertreter der Bau-akademie Teil der studentischen Vertretung der Universität.

Jedes Jahr finden Studentenwahlen an allen Fakultäten statt, an denen von den Studenten ihre stellvertretende Vertreter gewählt werden, sowohl in den Fachschaften, als auch im Präsidium der studentischen Vertretung der Universität. So nehmen vom Beginn die Studenten der Bauakademie im Wirken der studentischen Vertretung teil. In jedem Studienjahr versteht man darunter eine Reihe von Aktivitäten, mit der Aufgabe zur Besserung des Bildungsniveaus und des studentischen Lebensstandard; häufig sind Studenten auch in verschiedenen Aktionen anwesend, mit dem Ziel der Gemeinschaft, mit hilfreichen Leistungen beizutragen.

mijeva sportska natjecanja između fakulteta, nekoliko stručnih predavanja i puno druženja i upoznavanja kolega s drugih sveučilišta. Na građevinjadama naši studenti redovito dobro prolaze na sportskim natjecanjima, tako da polako popunjavamo police našega dekana u njegovu uredu s osvojenim peharima s posljednjih građevinjada.

Budući je stručna praksa obvezna na našem Fakultetu, otkrivši postojanje Međunarodne udruge za razmjenu studenata radi obavljanja stručne prakse, i to s mogućnošću razmjene u 86 zemalja članica udruženja, nekoliko se naših studenata odlučilo na otvaranje ureda ove udruge na našem Sveučilištu. Uz malo hrabrosti i veliku potporu našeg dekana i Sveučilišta, uspješno smo pokrenuli ured IAESTE-a po prvi puta u Mostaru. Time smo omogućili našim studentima obavljanje plaćene stručne prakse u svijetu, i po prvi puta doveli strane studente u grad, također radi obavljanja stručne prakse. Udruga trenutačno ured dijeli sa Studentskim zborom Građevinskog fakulteta i većinu najaktivnijih članova čine naši studenti. U prvoj godini postojanja, u akademskoj 2006./07. godini petero studenata Sveučilišta u Mostaru obavilo je svoju praksu u svijetu. Od njih petero čak ih je troje bilo s našeg Fakulteta u građevinskim tvrtkama u Španjolskoj, na Cipru i u Omanu. U sljedećoj godini uspjeli su pronaći stručnu praksu za strane studente u šesnaest domaćih tvrtki i institucija što znači da će upravo toliko naših studenata moći u svijet, ne samo

regularly twice a year at the Faculty of Civil Engineering in cooperation with the Department of Transfusiology of the Clinical Medical Center Mostar, where the response of students has always been remarkable. Humanitarian campaigns for collection of charitable funds are organized on a regular basis in pre-holiday times, before Christmas and Easter. Every year, the collected funds are sent to one of the city institutions that need them most, while it is always the students who hand over the money or appropriate presents, and during these holidays they pay friendly visits and bring joy to children with special needs, the old or the frail.

Very often, our students, as members of the Presidency of the University Students' Board, participated in important discussions, for example on the subject of the topical Law on High Education, but also on the subject of the present position of the University of Mostar. On a couple of occasions, they also stood by their colleagues from other faculties in public protests, organized by the University Students' Board, being held on some faculties in an effort to improve students' standard, lower school fees and solve other issues related to students. The Students' Board has regularly organized sports events for all students of the university. Thus, in the course of a school year, students have opportunity to participate in football, basketball, volleyball and table tennis competitions.

Certainly, what kind of student life would it be without entertainment, so it is the very Students' Board that has been organizing some of the greatest parties in the city, Brucošijada (Freshmen party) and Apsolvenska večer (Evening party of senior students who qualified for final thesis), in which the most popular musical performers take their turns every year. In addition, young artists, musicians and poets studying at our University have an opportunity to present their work in Evenings of Young Artists for a couple of years now.

{NE}ST@BILNOST®

{NE}ST@BILNOST®

Zweimal im Jahr werden von den Studenten traditionell, jahrelang, freiwillige Blutspenden an der Bauakademie unter Mitarbeit mit der Station für Transfusion des Klinikums in Mostar veranstaltet; immer ist an der Anzahl der Studenten eine bedeutende Anteilnahme abzulesen. Regelmäßig werden auch zur Advents- und zur Fastzeit humanitäre Aktionen zum Sammeln von Geldmitteln organisiert. Das Geld wird dann jedes Jahr in eine der an Finanzen bedürftigen Institutionen, und Studenten übergeben das Geld oder verteilen Geschenke zu diesen Feiertagen aus, Kinder mit Behinderungen, Alte oder Behinderte erfreuend.

Oft nahmen unsere Studenten als Mitglieder der der Studenten studentischen Vertretung der Universität an wichtigen Gesprächen teil; z.B. zum Thema des aktuellen Hochschulgesetzes, aber auch zum Thema des augenblicklichen Status der Universität in Mostar. Sie standen auch in einigen Fällen ihren Kollegen von den anderen Fakultäten bei; so auch an verschiedenen öffentlichen Kundgebungen unter Veranstaltung der studentischen Vertretung der Universität, die an einigen Fakultäten mit dem Ziel der Besserung des Lebensstandards, der Studentengebührermäßigung und Lösungen der anderen studentischen Probleme.

Die studentische Vertretung veranstaltet auch regelmäßig Sportwettbewerbe für alle Studenten der Universität. So haben durch das Studienjahr Studenten die Gelegenheit an Fußball-, Basketball-, Volleyball- und Tischtennisturnieren teilzunehmen.

Was wäre natürlich ein Studentenleben ohne Unterhaltung; unter Leitung der Studenten wurden eine der größten Partys in der Stadt veranstaltet: Erstsemesterpartys und Apsolventen-abende, auf denen jedes Jahr die populärsten Musiker spielen. Hier haben auch seit ein paar Jahren junge Künstler, Musiker und Dichter, die an unserer Universität studieren, Gelegenheit auf Abenden für junge Künstler ihr Werk zu zeigen. Die Studenten unserer Fakultät, mit

## GRAĐEVINIJADA

Ovogodišnje 13. Susrete studenata građevinarstva i geodezije Jugoslavije organizovao je naš fakultet. Sada kada je to iza nas, možemo reći »Bilo je uspješno«. Možda se čini na prvi pogled, da je i ova bila kao i mnoge prethodne Građevinijade, a ipak nije tako. S pravom se može zapitati nije li došao trenutak da se nešto promijeni, izmisliti nešto novo.

Bilo je raznih dilema čak i oko vrlo važnih stvari, kao što su sam karakter, a i način organizovanja Susreta, ali dileme ne bi smjelo biti oko činjenice da ovakve manifestacije treba isključivo da se odvijaju u duhu BRATSTVA I JEDINSTVA svih naših naroda i prava je sreća što ni jednom izuzetku (mislimo na veliki broj studenata titogratskog fakulteta), nije uspjelo to pomutiti.

Vrlo je vjerovatno da jedna Građevinijada nikada neće biti organizovana kao jedne ZOI. Nju će uvijek organizovati jedna grupica ljudi, koja će manje ili više biti opterećena raznim frkama, a kojoj će se ostali (mislimo na bližu okolinu) uvijek smijati s uvjerenjem da je hiljadu puta bolje na Građevinijadu ići »ilegalno«.

Sljedeću će frku imati studenti FGZ Osijek, a o ovoj našoj čitajte na 3, 8 i 9. str.

U osnovne organizacije SK na našem fakultetu studenti se slijavaju iz raznih sredina, ideološki različito potkovani, sa raznim motivima. Marksistička nastava u većini sredina iz kojih dolaze, nije im dala adekvatnu idejno-političku osnovu, da bi se uopšte mogli nesmetano uključiti u rad OOSK na fakultetu, bilo kakvu političku školu većina nije završila, i u takvoj situaciji, opterećeni velikim brojem časova i predmeta, studenti maksimalno izbjegavaju nastavu predmeta Markizam (koj im je, najčešće, posljednja sansa da se koliko-toliko osposobe za političke i

na usavršavanje u struci i učenje o tehnikama i metodama u drugim zemljama, nego i učenje stručnog stranog jezika. Također su prije par godina u okviru projekata Pakt o stabilnosti za jugoistočnu Europu i DAAD iz područja zaštite okoliša realizirane stipendije i boravci na Kaiserslautern-Universität i Ruhr-Universität Bochum. Informatički je dodatno studentska računalna učionica opremljena zahvaljujući suradnji s austrijskim sveučilišnim odborom WUS Austria, a također u dva navrata prilikom realizacije CEP projekata instalirana je značajna informatička oprema i edukativne verzije računalnih softvera.

Također svake godine u okviru redovitog studija naš Fakultet organizira stručne ekskurzije iz pojedinih kolegija, tako da smo posljednjih godina bili u prilici vidjeti i običi brojna gradilišta, uglavnom u Bosni i Hercegovini i Hrvatskoj. Vidjeli smo gradnju mostova, hidrotehničkih postrojenja, obnavljanje povijesnih objekata, geotehnička istraživanja, gradnju auto-ceste, sportskih dvorana... Primjerice, nekoliko smo puta obilazili gradnju nove auto-ceste A1 u Hrvatskoj, gradnju mosta u Dubrovniku, mosta u Skradinu, dvoranu u Zadru, utvrdu u Bobovcu i brojne druge objekte.

Iz godine u godinu unatoč težini studija studenti su kao što se vidi također vrlo aktivni i u izvannastavnim aktivnostima, koje pored toga što dodatno pridonose njihovom obrazovanju, čine najljepše studentsko doba još zanimljivijim.

Za kraj svakako vrijedi još istaknuti

In addition to participation in all activities organized by the Students' Board of the University of Mostar, students of our faculty together with their representatives also organize a number of events in their premises. Thus, it is worthy of noting that movies are often played in our faculty Multimedia Hall, providing the possibility for our students to enjoy popular movies in an environment that can offer experience of a movie hall at least for a moment, being that there is not a movie hall in Mostar. Very often, representatives of students of the Faculty of Civil Engineering organize social evenings for students of the Faculty of Civil Engineering, where students, and often assistants too, can have social time in a more relaxed atmosphere.

One of the greatest and most valuable projects is certainly the journal prepared by students of our faculty, titled (NE)STABILNOST ((IN)STABILITY). The journal has been published in six issues by now. It is edited and contributed by Students of the Faculty of Civil Engineering and every issue offers something for everybody's interests, from presently topical issues of the profession, to topics related to the University, the Faculty, Mostar and life of students, to eventually something for fun.

(NE)STABILNOST is actually a continuation of a successful journal prepared by students of the Faculty of Civil Engineering of Mostar that was coming out in 80-ies and that was called Uticajna linija. That was the journal that represented civil engineering students for years, and after dry 90-ies students have their paper back again.

Together with students from Croatia, our students regularly participate in the popular Građevinijada, the event of students of civil engineering faculties from universities in Croatia. Good organization of our representatives provides opportunity for more than 40 students of the Faculty of Civil Engineering from Mostar to participate in this event. Građevinijada means sports competitions between faculties, several professional lectures and a lot of good

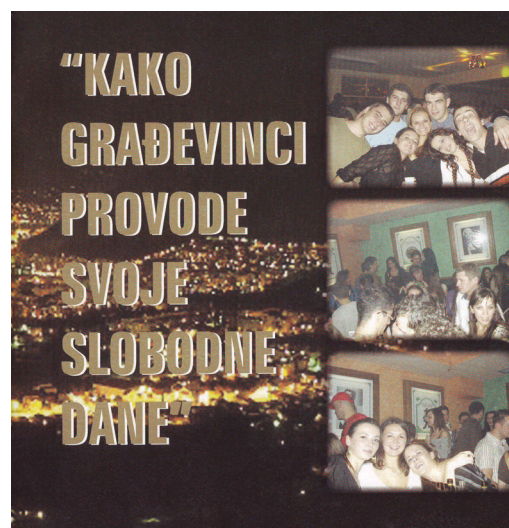

da je na Građevinskom fakultetu posljednjih godina ostvarena izuzetna suradnja između studenata s jedne strane i profesora i asistenata s druge. Većina profesora i asistenata je pristupačna, susretljiva, a naši studenti već godinama jedini na Sveučilištu imaju redovite sastanke s dekanom, prodekanom i asistentom za nastavu gdje se uvijek saslušaju i rješavaju svoje ideje, želje i potrebe te nastoje riješiti sve eventualne probleme s kojima se susreću. To je izuzetno bitno za cijelu klimu na Fakultetu, jer Građevinski fakultet djeluje kao jedno tijelo. Tko jednom prođe kroz naš Fakultet i na njemu diplomira, zauvijek ostaje vezan za ovu instituciju i osjeća se njezinim članom. Jednom građevinač – uvijek građevinač!

time with friends and new friends from other universities. In Građevinijadas, our students regularly do fine in sports contests, so we are slowly filling shelves in our dean's office with cups won in last Građevinijadas.

As technical experience is compulsory in our faculty, and having discovered about the International Association for the Exchange of Students for Technical Experience that offers the possibility of exchange within 86 association's country members, several of our students decided to open an office of this association in our University. With some courage and considerable support from our dean and university, we successfully pioneered an IAESTE office in Mostar. In this way, we provided opportunity for our students to perform paid professional training abroad, and pioneered in bringing foreign students into the city, also to do practical training. The association presently shares an office with Students' Board of the Faculty of Civil Engineering and the majority of its most active members are our students. In its first year of operation, in the academic year of 2006/07, five students from the University of Mostar completed their technical training abroad. Out of the five, even three were from our faculty who went to construction companies in Spain, Cyprus and Oman. In the next year, they managed to find practical training for foreign students in sixteen local companies and institutions, meaning that precisely so many of our students will be able to go abroad, not only for the professional training and studying of techniques and methods in other countries, but also training of the technical foreign language. In addition, scholarships and visits to Kaiserslautern-Universität and Ruhr-Universität Bochum were achieved a couple of years ago as part of the projects Stability Pact for South Eastern Europe and DAAD in the field of environmental protection. Students' computer classroom was additionally supplied with information technology

ihren Vertretern, und mit Teilnahme an allen Aktivitäten unter Organisation der studentischen Vertretung der Universität in Mostar, veranstalten auch eine Reihe von Tätigkeiten in ihrer eigenen Fachschaften. Hier muss man sagen, dass oft in dem Fakultätssaal Filme gezeigt werden, so dass unsere Studenten, wenigstens auch für kurze Zeit sich, mit berühmten Filmen, in einem anpassendem Ambient entspannen können; es ist das Erlebnis eines Kinosaaals, dessen in Mostar fehlt. Oft werden von den Vertretern der studentischen Vertretung der Bauakademie beliebte Studentenabende organisiert, wo Studenten und oft auch Assistenten einen heiteren Abend genießen können.

Eines der größten und wertvollsten Projekten ist sicherlich unsere Studentenzeitschrift mit dem Namen (Un)

items thanks to the cooperation with Austrian university board WUS Austria, and also on two occasions within the implementation of CEP projects, special computer equipment and educational versions of software were installed.

As part of the regular course of studies, our faculty also organizes study trips within some of the courses every year. Thus, in recent years we had opportunity to visit and see numerous construction sites, mainly in Bosnia and Herzegovina and Croatia. We observed construction of bridges, water engineering works, restoration of historical structures, geotechnical explorations, construction of a highway, sports halls... For example, on several occasions we visited the construction site of the new highway A1 in Croatia, construction of a bridge in Dubrovnik, bridge in Skradin, hall in Zadar, fortress in Bobovac and numerous other structures.

Despite the difficulty of the studies, as we can see students have been active also in extracurricular activities year by year, which apart from being an additional contribution to their education, also make the best students' age even more interesting.

For the end, it should also be stressed that an exceptional cooperation between students on one side and professors and assistants on the other has been established in recent years at the Faculty of Civil Engineering. Most professors and assistants are responsive and helpful, while for years now our students are the only ones at the University that have regular meetings with the dean, assistant dean and assistant for academic affairs, who carefully listen and answer their ideas, wishes and needs, and try to solve any problems they may face. That is exceedingly important for the overall climate at the faculty, because the Faculty of Civil Engineering functions as a single body. Whoever has gone through our faculty and has graduated from it, remains connected to this institution and feels part of it forever. Member of civil engineering once - member of civil engineering for all time!

Stabilität. Bis jetzt wurden 6 Ausgaben veröffentlicht. Sie wird von den Studenten der Bauakademie gestaltet; in jeder Ausgabe ist für jeden etwas da: aktuelle Themen, Themen zur Universität, zur Fakultät, Mostar und das Studentenleben; am Ende gibt es auch Unterhaltung.

(Un)Stabilität ist eigentlich eine Folge der erfolgreichen Zeitschrift der Bauakademie-studenten in Mostar, die in den 80-er veröffentlicht wurde und den Namen Einflußlinie trug. Diese Zeitschrift stand jahrelang für Baulernende da und wurde nach den öden 90-er von den Studenten wiederbelebt.

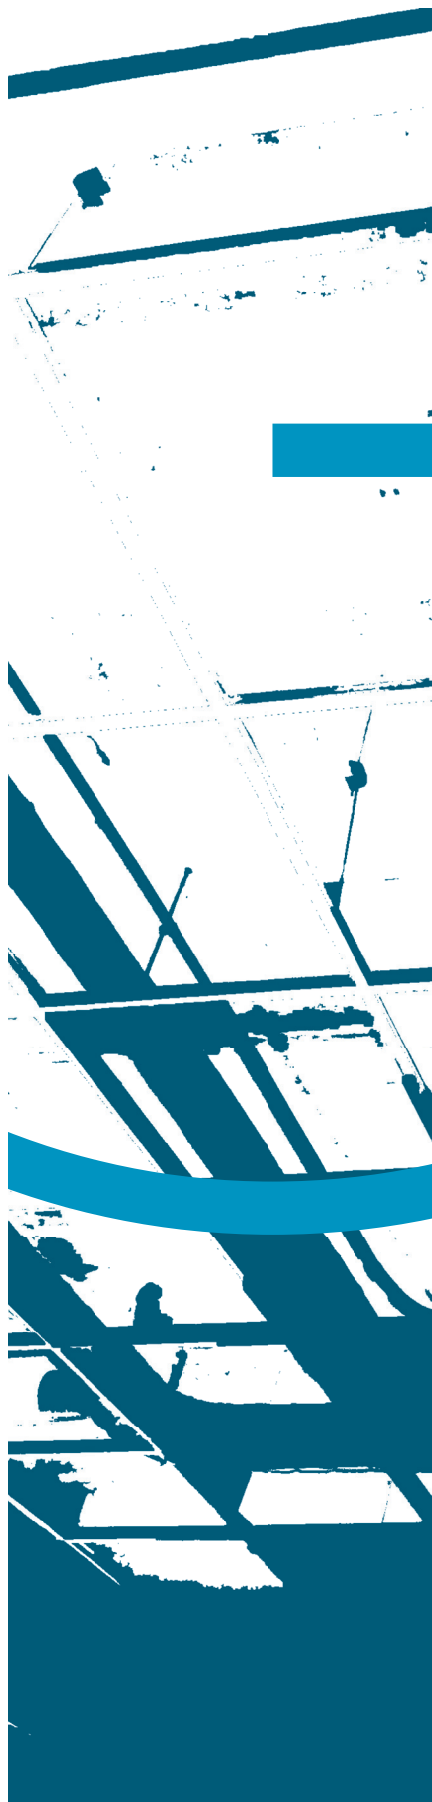

Unsere Studenten nehmen regelmäßig, mit anderen Studenten aus Kroatien, an dem populären Bauakademiefest teil, einer Veranstaltung der Bauakademiestudenten der Universitäten in Kroatien. Auf diesen Veranstaltungen wird mit bester Organisation unserer Vertreter für 40 Studenten in Mostar eine Reise ermöglicht. Unter Bauakademiefest versteht man Sportwettbewerbe zwischen Fakultäten, fachliche Vorträge und viel Gesellschaft und Kennenlernen mit den Kollegen von anderen Universitäten. Auf Bauakademiefesten zeigen unsere Studenten oft gute Ergebnisse in sportlichen Wettbewerben an, so dass der Regal in dem Dekanbüro mit den Pokalen langsam voll wird.

Da das Fachpraktikum an unserer Fakultät Pflicht ist, haben einige, unsere Studenten, das Bestehen des Internationalen Studentenaustauschdienstes entdeckt, das für das Ablegen des Fachpraktikums, mit Austauschmöglichkeit mit 86 Mitgliedsländern gegründet wurde.

Danach entschlossen die Studenten ein Büro dieses Dienstes an unserer Universität zu eröffnen. Mit Mut und Unterstützung unseres Dekans und der Universität wurde erfolgreich ein IAESTE- Büro zum ersten Mal in Mostar eröffnet. Dadurch wurde unseren Studenten ein Ablegen des fachlichen Praktikums weltweit ermöglicht; wir lu-

den zum ersten Mal fremde Studenten zum Ablegen des Praktikums in unsere Stadt ein. Der Dienst teilt jetzt sein Büro mit der studentischen Vertretung und der Großteil der aktiven Mitglieder sind unsere Studenten. Im ersten Gründungsjahr im Studienjahr 2006/07 machten 5 Studenten der Universität in Mostar ihr Praktikum in der weiten Welt. Von 5 Studenten waren sogar 3 Bauakademiestudenten in Baufirmen in Spanien, auf Zypern und in Oman. Im folgenden Jahr fanden sie für fremde Studenten Fachpraktikumen in 16 innenländischen Firmen und Institutionen, was auch bedeutet dass 16 unsere Studenten eine Gelegenheit haben werden, in die Welt zu reisen, und zwar nicht nur zur fachlichen Weiterbildung und zum Lernen der Techniken und Methoden, sondern auch zum Erlernen einer fachlichen Fremdsprache. So wurden auch vor ein paar Jahren Stipendien im Rahmen des Stabilitätspaktes für Südost-europa und des DAAD-Dienstes für Umweltschutz und Aufenthalte an der Kaiserslautern und Ruhr- Universität Bochum. Das studentische Informatiklabor wurde unter Mitarbeit des österreichischen Universitätsausschusses WUS Austria zusätzlich ausgestattet; auch wurden zwei mal während der Realisation der CEP Projekte informatische Ausstattung und Lehrsoftwareversionen installiert. Jedes Jahr werden auch von Seiten unserer Fakultät Fachexkursionen in einigen Fachen organisiert; so waren wir in den letzten Jahren in der Lage zahlreiche Baustellen, in Bosnien und Herzegowina und in Kroatien, zu sehen und zu besuchen. Wir betrachteten Brücken-ausbau, Bau von hydrotechnischen Anlagen, Rekonstruktion von Denkmälern, geotechnische Forschungen, Autobahn-, Sporthallenausbau... Wir besuchten z.B. ein paar mal die Baustelle der neuen Autobahn A 1 in Kroatien, den Brückenausbau in Dubrovnik, in Skradin, die Halle in Zadar, die Festung in Bobovac und zahlreiche andere Objekte. Von Jahr zu Jahr sind Studenten, trotz

des umfassenden, schwierigen Studiums, auch in außerfakultätischen Aktivitäten anwesend, die auch ein Zusatz zu ihrer Bildung sind und außerdem die Studentenzeit zur schönsten Zeit gestalten.

Am Ende muss noch hervorgehoben werden dass an der Bauakademie in den letzten Jahren eine hervorragende Zusammenarbeit zwischen den Studenten einerseits und den Professoren und Assistenten andererseits besteht. Der Großteil der Professoren und Assistenten ist hilfsbereit und unsere Studenten haben als einzige schon jahrelange Treffen mit dem Dekan, und dem Assistent für Unterricht, zu welchen Gelegenheiten man immer Ideen, Wünsche und Bedürfnisse der Studenten anhört, und wo man alle eventuellen Probleme zu lösen versucht.

Das ist unbedingt wichtig für die Atmosphäre an der Fakultät, denn die Fakultät ist ein Korpus. Wer einmal an unsere Fakultät kommt und auch einen Hochschulabschluss an ihr erlangt, bleibt für immer mit dieser Institution verbunden und fühlt sich als ihr Mitglied.

Einmal Baumeister - immer Baumeister.
