

WORKSHOP 3

Design for Reuse

The workshop aims to showcase reuse potential of the rest material from the construction as a measure to reduce construction waste. During the construction of the first phase of the Green Design Centre, contractor has stored the rest material from the construction such as wood, aluminium, polycarbonate panels. This rest material will be used during the workshop to design and make a piece of urban or interior mobiliary for the Green Design Centre

STUDENTS are encouraged to submit their application to their professor at the University until 10th of September. A limit of 5 students per faculty has been agreed. Travel and accommodation costs are covered by the organisation.
